#### HOLD HARMLESS AGREEMENT

PLEASE DO NOT THROW THIS PERMIT AWAY.

THIS PERMIT NEEDS TO BE PRESENTED WHEN PICKING UP MATERIAL @ COUNTY SHOP TO PATCH ANY POT HOLES THAT FORM DURING THE PERMIT PERIOD FOR ASPHALT PRODUCTS.

The Permittee or Assigns has the entire responsibility for any and all injury to the public and to individuals in connection with picking up cold mix patch material at any Linn County shop. The Permittee is responsible for loading patch material into their own container or vehicle.

The Permittee expressly agrees to indemnify, defend and hold the County, its directors, officers, and employees free and harmless from and against any and all loss, liability, expense, claims, costs, suits, and damages including attorney's fee, arising out of Permittee's or Assigns' operation or performance under this agreement.

Signature of Permittee -

I agree to Hold Harmless Agreement above.

**(Permit is not valid without signature on back page agreeing to conditions.)**

## AGREEMENT TO CONDITIONS OF DUST CONTROL PERMIT

The Linn County Board of Supervisors has adopted the "Linn County Dust Control Policy" for secondary roads. Individual participation in the program is in accordance with the following conditions.

- 1) Calcium Chloride
  - a. Applied during May or June and/or during July or August, weather and road conditions permitting. The minimum application length is 150 ft. with additional contiguous application increments of 50 ft. The width will be approximately 22 ft.
  - b. The fee for a single application will be \$ 0.75/lf per treatment. Two applications are therefore \$1.50/lf.
  - c. Second applications will be placed in the same location.
  - d. Calcium Chloride is still effective with light blading.
  
- 2) MC-70 (Road Oil) or MC-3000 (Seal Coat)
  - a. Sign up for MC-70 and MC-3000 is April 1<sup>st</sup> – May 10<sup>th</sup> only.
  - b. Applied once during June or July, weather and road conditions permitting. The minimum application length will be 150 ft. with 50 ft. additional increments of length. The width will be approximately 22 ft.
  - c. MC-70 shall be required pretreatment for applying seal coat products.
  - d. The fee for a single application is listed on the front of the permit.
  - e. Permittee is responsible for perpetually keeping the treated portion free of potholes by filling them as soon as practicable. Filling the potholes will extend the life of the dust control. When patch material is obtained at a Linn County Secondary Road shop, the Permittee is responsible for loading the material into their own container or vehicle. Maximum amount of material is 1 ton.
  
- 3) Secondary road residents must sign up for the dust control program in the following manner.
  - a. The sign up periods are:
    - First Application - April 1<sup>st</sup> through May 10<sup>th</sup> (county business days)
    - Second Application – June 1<sup>st</sup> through July 10<sup>th</sup> (county business days)
  - b. Fee payments must be made at the time of sign up by cash, check or credit card(with fee). Any check returned for insufficient funds will automatically cancel the individual's permit and permittee is responsible for any bank fees charged and any cost incurred by county.
  - c. If the end of sign up falls on a weekend, permits and payment are due by end of Engineer Office business hours on the preceeding Friday.
  - d. Permits can be printed off website at [www.linncounty.org/engineer](http://www.linncounty.org/engineer) and mailed in with payment, or sign up in person at the Linn County Engineer's Office. Office hours are Monday - Friday 7:00am-3:30pm.
  
- 4) Many conditions affect the performance of the treated surface, including traffic, weather, soil condition, and dust control material used. Effectiveness of material is not the responsibility of Linn County and no guarantee is given as to satisfaction of dust control.
  
- 5) Linn County is not liable for blading through unpermitted or unmarked dust control sites. Permittees are required to maintain flag at their treated areas. Additional flags may be obtained at the County Engineer's Office.
  
- 6) The treated sections may be scarified and bladed at any time if it is determined by the District Foreman, Operations Superintendent or County Engineer that the surface has degraded to the extent that it affects traffic. Patching with material available @ County shops may extend the service life of asphalt dust control.
  
- 7) Iowa law specifies that the purpose of a public highway is to serve the traveling public. Linn County reserves the right to scarify any treated section and maintain as a rock surface. The County gives the Permittee seven (7) calendar days notice (from date of mailing) to take care of holes or irregularities. If maintenance is not completed in seven days the road department will scarify road section and restore rock surface.
  
- 8) This permit is valid until October 31 of the year issued, and the County reserves the right to scarify all portions after this date without notice to the Permittee if in the County's opinion the surface will not remain reasonably sound throughout the winter and spring and may negatively affect travel and winter service.
  
- 9) Unless approved by the County Engineer to be retained, all dust control sections will be scarified after May 10<sup>th</sup> to prepare the road for the new dust control application. If the treated area is determined to be in condition to be retained for the new permit season, the resident must apply for a current permit to maintain the treated area.
  
- 10) The Board of Supervisors Policy for Fugitive Dust Control can be found at [www.linncounty.org/engineer](http://www.linncounty.org/engineer)

**Permittee Signature - I have read the conditions of the permit.** \_\_\_\_\_
